## Education

**Bursa Technical University**

**Turkey**

Degree : 3,14

Graduation Date : 06.2021

## Skills & Interests

- **Version Control Systems:** Git, Github and Gitlab usage.
- Strong knowledge of JavaScript and JavaScript Frameworks:
- JavaScript: Fundamental and advanced language knowledge, OOP concepts, asynchronous programming, DOM manipulation, event handling
- **ReactJs:** Core principles, components, data flow, prop management, state management (Redux and Zustand included), reusability, testing.
- HTML and CSS: Web standards and best practices, responsive design principles, accessibility guidelines  
skills, knowledge, abilities, or achievements.
- Databases: SQL queries, basic understanding of NoSQL and relational databases.
- **Authentication:** User login and authentication, JWTs, OAuth, integration with identity providers.
- Good problem-solving and communication skills.
- Unit and integration testing: My test-driven approach enables me to identify code defects and malfunctions early in the development process, leading to the delivery of robust and bug-free software.
  - React Testing Library
  - Jest
  - Vitest
  - Cypress

## Open Source Projects

- **React-Portfolio:**

- This particular site is built using React, a JavaScript library for building user interfaces.
- It follows a component-based architecture, allowing each component to be managed independently and reused throughout the site.
- While designing the site, special attention was paid to responsive design and an effort was made to provide the same image on every platform.

Keywords: Nextjs, Emailjs/browse, Fast-marquee, Github-corner, Tailwindcss

- **React Weather App:**

- The weather app website is a web application that displays weather information to users, typically providing forecasts for a specific location or a location input by the user.
- It retrieves weather data through API calls and presents it to the user in a user-friendly manner using React components.
- Additionally, React's state management and JSX syntax enable dynamic content and user interactions.

Keywords: Vitejs, Axios, ReactQuery, Tailwindcss, Phosphor Icons and Daisyui.

Organization	Experience	Hybrid / Remote
Suforia / Level2App	01.05.2024- Continues	Remote
We are a team where we examine influencer data with the API provided by Instagram and work with the Nextjs framework.		
Freelance React Work	15.11.2023- 01.05.2024	Istanbul
Although I may lack experience, my passion and eagerness to learn are boundless. My quick learning abilities and problem-solving skills allow me to grasp new technologies quickly and come up with creative solutions to complex problems. By working in this position, I believe I can contribute not only as a developer but also as an active member dedicated to the team's success.
